Sediment Sampling and Source Identification Program
Volume 2a of 3
IWP
Revision 1
September 2005

Table 5-3
Method 8082 Sample Quantitation Limits for Aroclor PCBs<sup>a</sup>

Compounds	Water (μg/L)	Sediment (µg/kg)
Aroclor-1016	1	33
Aroclor-1221	1	33
Aroclor-1232	1	33
Aroclor-1242	1	33
Aroclor-1248	1	33
Aroclor-1254	1	33
Aroclor-1260	1	33

## Notes:

a. Specific quantitation limits are highly matrix-dependent. The laboratory-derived MDL must be at least a factor of three less than the SQLs provided in this table. Quantitation limits listed for sediment are based on wet weight. Quantitation limits reported by the laboratory for sediment are calculated on a dry weight basis and will be higher.
 ug/kg = micrograms per kilogram
 ug/L = micrograms per liter
